OUTLOOK Asian markets ended mixed on Thursday as investors reacted to the latest corporate earnings results, upbeat private-sector job growth data from the US and disappointing Chinese data. Chinese shares ended slightly higher as hints of more stimulus helped outweigh disappointing data. The assurance came as survey data from IHS Markit showed that China's manufacturing sector expanded only slightly in October. The Caixin Purchasing Managers' Index came in at 50.1 in October versus 50.0 in September, as output remained broadly unchanged amid marginal increase in new business. Meanwhile, India has improved its ranking on the World Bank's 'ease of doing business' report for the second straight year. In its annual 'Doing Business' 2019 report, World Bank (WB) said India jumped 23 places to rank 77th position on the back of reforms related to insolvency, taxation and other areas. Last year, India was ranked 100th in the World Bank's Doing Business report. As per the report, India improved its rank on 6 out of the 10 parameters relating to starting and doing business in a country. These parameters include ease of starting a business, construction permits, getting electricity, getting credit, paying taxes, trade across borders, enforcing contracts and resolving insolvency. The most dramatic improvements have been registered in the indicators related to 'Construction Permits' and 'Trading across Borders'.

TRADING STRATEGY: As on (29/10/2018)

BULL CALL SPREAD:

The bull call spread option trading strategy is employed when the options trader thinks that the price of the underlying asset will go up moderately in the near term. Bull call spreads can be implemented by buying an at-the-money call option while simultaneously writing a higher striking out-of-the-money call option of the same underlying security and the same expiration month.

Bull Call Spread Construction

Buy 1 ITM Call
Sell 1 OTM Call

Maximum gain is reached for the bull call spread options strategy when the stock price move above the higher strike price of the two calls and it is equal to the difference between the strike price of the two call options minus the initial debit taken to enter the position.

Max Profit = Strike Price of Short Call - Strike Price of Long Call - Net Premium Paid - Commissions Paid
Max Profit Achieved When Price of Underlying >= Strike Price of Short Call

EXECUTION: BUY NIFTY 10000 CALL AROUND 220-225 AND SELL NIFTY 10400 CALL AROUND 90-95, TOTAL PREMIUM RECEIVED AROUND 130, TGT 170-180. SL AS PER TRADERS CHOICE.....

RESULT -
