MARKET INSIGHT

-  **On Jun 13** : Erasing some of their initial gains, key equity benchmarks ended the volatile day of trade marginally in green on Wednesday, on account of buying in frontline blue chip counters. Markets made positive start and traded slightly in green, as traders took some support with report that India's industrial production grew 4.9 percent in April, as compared with 4.4 percent jump in March. The factory output index growth rate moderated in March after consistently being above 7 percent between November and February. It expanded 6 percent a year ago. Traders also took some support with the Ministry of Shipping stating that a total of 224 projects -- entailing an investment to the tune of Rs 1.85 lakh crore have been awarded by March 2018 under Sagarmala programme.
-  Key indices gave up some of their gains in last leg of trade to come off their intraday high points, on the back of higher Inflation data. India's retail inflation hit a four-month high after jumping to 4.87 percent in May from April's 4.58 percent driven by costlier food and fuel. Retail inflation, measured by Consumer Price Index (CPI), had fallen to 2.18 percent in May 2017. Anxiety also spread among the investors, as industry body CII warned that rate hike by the Reserve Bank will increase the cost of doing business and impact capital expenditure by India Inc.
-  On the global front, Asian markets ended mostly in red; as investors braced for a Federal Reserve policy decision later in the day and any clues it might give on future rate hikes that could alter the course of global economic growth and corporate earnings. Back home, Shares of top telecoms operators Airtel, Idea Cellular and Reliance Communications dropped after Reliance Jio introduced an offer of giving more data to users. The firm is offering 1.5 GB additional data per day to customers on all pre-paid plans priced in the range of Rs 149 to Rs 799.
-  Meanwhile, continuing its rising trend for the second straight month, India's retail inflation edged higher to 4.87% in the month of May 2018, as compared to 4.58% in April 2018 and 2.18% in May 2017. Rising prices of food items such as vegetables and fruits coupled with high fuel rates lifted the Consumer Price Index (CPI) to a four-month high in the reported month. Further, consumer food price inflation, a metric to gauge changes in monthly kitchen costs, surged to 3.10% in May from 2.80% in the previous month. Besides, weakness in the global markets too arrested some gains. However, markets managed to keep their heads in green terrain, as some solace came with a report that the Central Board of Indirect Taxes and Customs (CBIC) has extended the refund fortnight for fast track clearance of pending dues to exporters by two days till June 16.

MARKET OUTLOOK- CAUTIOUSLY OPTIMISTIC

Quantitative Analysis: The BSE Sensex ended at 35752.93, up by 60.41 points or 0.17% after trading in a range of 35715.96 and 35877.41. There were 17 stocks advancing against 14 stocks declining on the index. The broader indices ended in red; the BSE Mid cap index dropped by 0.45%, while Small cap index was down by 0.19%. The CNX Nifty ended at 10858.75, up by 15.90 points or 0.15% after trading in a range of 10842.65 and 10893.25. There were 28 stocks advancing against 22 stocks declining on the index. The top gainers on Nifty were Dr. Reddys Lab up by 2.80%, Cipla up by 2.65%, TCS up by 2.37%, Titan Co up by 1.84% and Lupin up by 1.84%. On the flip side, Tata Steel down by 2.14%, Zee Entertainment down by 1.61%, Bajaj Finance down by 1.28%, Adani Ports & SEZ down by 1.23% and Bharti Airtel down by 1.21% were the top losers. For upcoming sessions, 10900-950 could be the near term resistance zone however we believe domestic markets may continue its splendid performance in upcoming weeks. Any negative outcome from global or domestic markets may shatter this euphoria however at current juncture no such possibility is expected. On the down side 10000-10050 could provide important cushions.
