METHODOLOGY:

-  The Portfolio adopts a quantitative and qualitative approach based on fact based to portfolio selection.
-  The Portfolio is based on combination with an understanding of individual stocks , growth in promoter stake on quarterly basis, net profit growth on quarterly basis and stocks available on lesser p/e as compared to industry standards.
-  The portfolio is designed for Short term purely on technically sound securities recommendation. Hence on regular intervals profit booking is necessary.

Note: As all above stocks are purely selected on the basis of technical Analysis Hence it may be possible that fundamentals of some stocks are not in line as per standard mode of acceptance. Hence only Risky traders with short term duration (less than 1 year) will accumulate these stocks at prescribed levels. Moreover all above stocks are currently corrected from their highs and right now trading their near by support levels. Markey conditions seems very attractive for 2019 as global markets as well as Asian markets may continue their northward journey at least for 1 half in upcoming year. On negative side any upset in upcoming general elections or any other geo political tensions may dampens this Euphoria however any correction near to 9900-9700 could be used as an opportunity to go long.....
